MANVENDRA SHARMA

Senior Full Stack Engineer | Technical Lead | Angular • React • Node.js • TypeScript

Gurugram, India | +91 8650906741 | manvendrasharma39@gmail.com | linkedin.com/in/monugargacharya

Open to Remote & Relocation

PROFESSIONAL SUMMARY

Senior Full Stack Engineer and Technical Lead with 7+ years of experience building high-scale web products with Angular, React, Node.js and TypeScript. Led teams of 5–8 engineers shipping telematics, utility and SaaS platforms used by **500K+ connected vehicles**, **250K+ users** and **3.3M+ utility consumers**. Proven record of zero-to-one delivery (two platforms architected from scratch), performance engineering (**85% faster** live fleet tracking) and security hardening (**passed VAPT audit**). Owns features end to end — UI architecture, REST APIs, PostgreSQL data models, payments, SSO and production support.

TECHNICAL SKILLS

Frontend: Angular (9–19), TypeScript, JavaScript (ES6+), RxJS, NgRx, React.js (18/19), Redux Toolkit, Next.js, HTML5, CSS3, SCSS, Tailwind CSS, Angular Material, Material UI, Bootstrap, Angular SSR, i18n

Backend & Databases: Node.js, Express.js, LoopBack, RESTful APIs, JWT, Cron Jobs / Schedulers, Botpress, PostgreSQL, MySQL

Real-Time, Maps & Charts: WebSockets (STOMP), Google Maps API, HERE Maps API, Marker Clustering, Heatmaps, Chart.js, Highcharts

Security & Identity: SAML 2.0 SSO, Microsoft ADFS, Active Directory / LDAP, RBAC, HMAC-SHA256 Request Signing, AES Encryption (CryptoJS), OWASP / VAPT Remediation, Code Obfuscation

Integrations: CCAvenue, Razorpay, BillDesk, WhatsApp Business API, Firebase

DevOps & Tools: Git, GitHub, GitLab, Docker, Nginx, Contabo, Vite, Webpack, JIRA, Postman, ESLint, Prettier, Claude Code

Leadership & Process: Team Leadership, Mentoring, Code Reviews, Agile/Scrum, Release Management, Stakeholder Management, Production Support

PROFESSIONAL EXPERIENCE

Sampark Softwares Pvt. Ltd. | Gurugram, India — **Jun 2021 – Present**

Team Lead – Full Stack (JavaScript) — Oct 2023 – Present

Sr. Software Engineer — Jun 2021 – Sep 2023

- Lead teams of 5–8 engineers across 9 enterprise products for clients including VE Commercial Vehicles (Eicher) and PGVCL; own architecture, sprint planning, code reviews, client requirement sessions, UAT sign-off and production support.
- Own source control and release management on GitHub: GitFlow-style branching (feature, bugfix, hotfix, release), pull-request reviews, **80+ semantic-versioned release tags with release notes**, and promotion through dev, QA, pre-prod and production.
- Architected **2 platforms from scratch** (Angular 16 and Angular 19 SSR) and modernized legacy codebases — Angular 9 → 15 upgrade, GitLab → GitHub migration and MySQL → PostgreSQL migration.
- Led VAPT remediation for the My Eicher platform, closing **15+ security findings** with HMAC-SHA256 request signing, encrypted URLs and payloads, secure storage, security headers and code obfuscation; the application **passed the audit**.

Key Projects

My Eicher – Connected Vehicle & Fleet Management Platform | *VE Commercial Vehicles (Eicher)* — Jan 2022 – Present

- Lead development of Eicher's flagship telematics portal serving **500K+ connected vehicles** and **250K+ users** across 120+ Angular modules — live tracking, trip playback, geofencing, alerts, fuel/DEF analytics, uptime and service bookings.
- Cut live-tracking load time for large fleets (1,600+ vehicles) from **20+ seconds to ~3 seconds (~85% faster)** by reworking how vehicle data is fetched and rendered.
- Built real-time Live Cluster dashboards streaming vehicle telemetry over STOMP WebSockets, plus EV modules (battery health, charging management, performance comparison) and CNG/LNG fuel support.
- Implemented marker clustering on Google Maps (default and custom) and on HERE Maps for dense fleet views.
- Delivered ADFS (SAML 2.0) single sign-on through a Node.js service, and a Node.js CCAvenue payment service (encrypted requests, webhooks, payment links, status reconciliation) processing **1,000+ payments a month**.
- Implemented persona-based RBAC (module- and tab-level); shipped payment links, proforma invoices, coupons, driver onboarding with bulk upload, and the frontend for a voice-enabled Connected AI assistant.

Tech: *Angular 15, TypeScript, RxJS, Node.js, LoopBack, STOMP WebSockets, Google Maps, HERE Maps, Highcharts, Firebase, SAML 2.0, CCAvenue*

VTS – Vehicle Dispatch & Tracking System | *VE Commercial Vehicles (Eicher)* — Mar 2026 – Present

- Lead development of a React 19 + TypeScript logistics platform tracking **12,000+ vehicles a month** from plant to dealer, with 8 role-based portals (admin, plant operations, QC, security, yard, sales, dealer, transporter).
- Built live Google Maps tracking, ePOD (electronic proof of delivery), freight billing, yard management and accident/breakdown workflows, secured with ADFS SSO and HMAC-signed APIs.

- Built a reusable reporting framework powering **15+ SLA, lead-time, ePOD-compliance and exception reports** with user-customizable columns, multi-select filters, drill-downs and Excel export.

Tech: *React 19, TypeScript, Vite, Tailwind CSS, Redux Toolkit, React Router, React Hook Form, Google Maps API, Chart.js*

C&M Control Tower – Haulage & Mining Fleet Operations | *VE Commercial Vehicles (Eicher)* Oct 2024 – Present

- Delivered an Angular control tower for construction and mining fleets, including a POI heatmap that renders **7,000+ points in ~1 second**, live fleet map and grid views, productivity and uptime dashboards, and WebSocket-driven live clusters.
- Built trip operations, ticketing, ePOD, alert thresholds and WhatsApp notifications, with HMAC-signed API requests.

Tech: *Angular 15, TypeScript, RxJS, STOMP WebSockets, Google Maps API, Highcharts, Chart.js*

Subscription, Loyalty & Payments Platform | *VE Commercial Vehicles (Eicher)* Jul 2023 – Present

- Built and lead a Node.js/Express backend with **150+ REST APIs** for subscriptions, rule-based coupons, wallets, loyalty points and extended warranty, plus an Angular admin console.
- Integrated Razorpay and CCAvenue with GST/TDS-compliant invoices, proforma invoices and EY (Ernst & Young) finance data sync; added a nightly scheduler that reconciles pending payment statuses.
- Migrated the data layer from **MySQL to PostgreSQL**; secured APIs with JWT, bcrypt hashing and rate limiting.

Tech: *Node.js, Express.js, PostgreSQL, MySQL, Angular 13, JWT, Razorpay, CCAvenue, node-schedule*

WhatsApp Business Chatbot | *VE Commercial Vehicles (Eicher)* Jun 2021 – Present

- Built and scaled Eicher's WhatsApp customer-engagement bot handling **1M+ messages a month**, with 110+ Node.js APIs for service booking, breakdown reporting, live location, repair status, invoices, payment links and feedback.
- Delivered template-based marketing campaigns for truck and bus launches in English and Hindi, with delivery-report (DLR) tracking, Gamooga analytics and ticketing-tool integration.

Tech: *Node.js, Express.js, Botpress, Angular, PostgreSQL, MySQL, WhatsApp Business API*

Smart Meter Warehouse & Workforce Management (WFM/WHM) | *PGVCL* Mar 2025 – Present

- Architected from scratch an Angular 16 platform (85+ lazy-loaded modules) managing the full lifecycle of **3.3M+ smart meters** — warehouse intake, lab testing, dispatch, installation, repair and OEM returns — for **10,000+ field technicians**.
- Built L1/L2/L3 approval workflows, SIM/modem assignment, seal management, GRN/MRN traceability and MDM/HES system sync, with RBAC, audit logs and OTP login.
- Hardened the application with code obfuscation, dev-tools blocking, idle auto-logout and security headers.

Tech: *Angular 16, TypeScript, RxJS, Angular Material, Bootstrap, IndexedDB, Firebase, CryptoJS*

Smart Meter Consumer Portal | *PGVCL* Jul 2025 – Present

- Built from scratch an Angular 19 server-side-rendered (SSR) portal for **3.3M+ electricity consumers**: usage analytics, load profiles, prepaid and postpaid billing, quick recharge, remote meter display, complaints and service requests.
- Integrated BillDesk payments and English/Hindi/Gujarati localization, plus an admin console with SMS logs and reports.

Tech: *Angular 19, Angular SSR, TypeScript, Express.js, ngx-translate, BillDesk, Chart.js*

ITSM & ITAM SaaS Platform | *Sampark Softwares product, 8+ clients* Mar 2025 – Present

- Lead development of Sampark's multi-tenant ITSM/ITAM product used by **8+ enterprise clients**: incident, service-request and change management, SLA engine with escalation matrix and rosters, knowledge base and ADFS/Active Directory SSO.
- Built IT Asset Management: assets, warehouses, requestable items, bulk import, custom fields and system-information sync.
- Extended the open-source Sim workflow builder (Next.js, React 19) into an embedded **no-code ITSM rule designer** with custom nodes for AND/OR approver groups, escalations and duplicate checks, compiling rules to JSON for the ITSM engine.

Tech: *Angular 16, NgRx, RxJS, TypeScript, Bootstrap, Next.js, React 19*

Multi-Client Web Chatbot Platform | *Sampark Softwares* Jul 2023 – Sep 2024

- Built a single React codebase that delivers **10 white-labeled web chatbots** for clients including Eicher, MHL and One Stop Dental, integrated with the Botpress Converse API and featuring cards, carousels, forms, auto-login and notifications.

Tech: *React 18, Redux Toolkit, Material UI, Ant Design, Axios, Botpress*

Career Break | Family health responsibilities during COVID-19 **Dec 2019 – May 2021**

HID India Pvt. Ltd. | Bengaluru, India **Jan 2018 – Nov 2019**

Technical Consultant Nov 2018 – Nov 2019

Software Trainee Jan 2018 – Oct 2018

- Built React/Redux client portals for banking and healthcare: 2-step verification login, payee and trusted-device management for secure banking transactions, and doctor/patient portals for appointments, prescriptions and medical records.
- Designed ID card templates for client identity-credential programs.

EDUCATION

Master of Computer Applications (MCA) | GLA University, Mathura 2016 – 2018

Bachelor of Computer Applications (BCA) | GLA University, Mathura 2013 – 2016
